

Joe Tao

Product Designer | Growth & GTM | Design Systems | AI-Assisted Workflows | London, UK

glj-it.github.io/portfolio / joe.tianchen.tao@gmail.com / +44 7404 641 570 ♦ Currently in interview progress with a leading UK proptech.

SUMMARY

Product Designer with 3+ years shipping conversion-critical products across the UK and China. UCL MSc HCI, Distinction. Doubled checkout CVR and cut cart abandonment by 50% at Depology through a full-funnel [mobile commerce system](#). Currently owning IA, component systems, and AI-assisted workflows across three platforms at TUTU VIEW, reducing production labour by 70%. Research contributed to [ACM CHIWORK '25](#), presented in Amsterdam and [pitched to Google](#) via UCL Interaction Centre.

Latest case study: [property-tech search engine UX](#).

EXPERIENCE

Product Designer - Systems Lead, TUTU VIEW (Sino-British digital products, 3 live consumer platforms), London Jul 2025 - Present
Sino-British business consultancy with live consumer ventures across travel, education, and digital services.

- Pioneered UX simulation framework using 400+ AI-generated user personas; evaluated outputs against usability heuristics to surface friction at scale across product and system decisions.
- Owned end-to-end product design across 3 international digital platforms, shaping experiences from discovery and IA through to launch, optimisation, and developer handoff, including a live mobile visa-checker app in production.
- Built a shared component library and token system across 3 brands, improving consistency and cutting production time by 40%.
- Established AI-assisted prototyping and delivery workflows using Claude Code and Figma MCP, reduced recurring design and production labour by 70%.
- Conducted customer behavioural analysis in collaboration with product and engineering stakeholders, applying human-centred design principles to define IA and product structures; secured founder buy-in to inform system decisions and roadmap.
- Designed the social-to-conversion funnel for Nihao Serica, contributing to 1,500 followers and 220,000 likes in the first month through UX-aligned creative, landing-page architecture, and content strategy.

Product Designer - Conversion, Depology, Shenzhen Dec 2024 - Jun 2025
Seoul-founded Korean skincare DTC brand; Shenzhen branch driving digital product and growth.

- Doubled checkout CVR (+100%) across two product rollouts through full-funnel redesign, using heatmaps, session recordings, cohort data, and usability findings to remove high-impact drop-off points.
- Built a component library, documentation, and handoff SOPs, improving checkout consistency and cutting design-to-build time by 30%.
- Created a Research-UI-Ads usability testing and A/B framework that compressed testing cycles from 2 weeks to 4 days.
- Improved cart abandonment by 50% through research-led redesign of product, cart, and checkout interactions.
- Led prioritisation across design, media buying, technical implementation to keep page UX, ad promise, and user perception aligned.

Junior Product Designer - Travel UX, Travel to Qin, Shenzhen Aug 2024 - Dec 2024
CITS-backed inbound travel startup promoting China travel experiences to international audiences.

- Led research through interviews, focus groups, and field studies, then produced a 50-page IA and wireframe specification defining navigation UX, information hierarchy, and scalable patterns across a mobile travel app.
- Designed scalable web layouts, high-fidelity Figma prototypes, and Shopify/WordPress handoff from zero.
- Built an internal product-uploading workflow that reduced launch cycle by 50% and content labour by 50%.
- Created user journeys and service-flow logic across travel planning, content operations, and supplier-side product publishing.

Digital Designer (Part-Time), DAUH UK / manila.design, Leeds Oct 2022 - Sep 2023
Independent industrial and brand design studio; co-venture of manila.design (UK) and Cover (China).

- Led UX research for a B2C e-commerce platform using interviews and Google Analytics.
- Built reusable UI patterns across product, content, and checkout journeys, improving consistency from discovery to purchase.
- Analysed behaviour with Google Analytics and SEMrush to identify 7 conversion blockers, improved key flows to cut drop-off by 10%.
- Collaborated with developers on responsive implementation and production-ready handoff.

UI Design Intern (Enterprise Web UI), Quadtalent Technology, Shenzhen Apr 2021 - Sep 2021
Gaorong-backed Shenzhen big-data firm; Malaysian & Chinese enterprise stakeholders. Founded by ex-Alibaba and Huawei leadership.

- Assumed sole UI ownership mid-project, self-taught Figma, CSS, HTML, and JavaScript in 3 days under live project pressure, and shipped a 15-page enterprise website with minimal engineering revision.
- Designed enterprise web UI and dashboard surfaces across multi-layer approval cycles.
- Built 12 Python-based data visualisation components for C-suite presentations, applying consistent visual language and data hierarchy for executive decisions; conducted competitive analysis and heuristic evaluations to support user-centred design guidelines.

Additional B2B Exposure, Italy and Germany Apr 2022 - Sep 2023
Industrial exhibition exposure across oil and gas, manufacturing, and technical buyer environments.

- Staffed JK Mechanical Seal stand at OMC Med Energy Conference for 3 days, supporting visitor engagement and product promotion.
- Supported Chinese sales team across 3 days of private meetings, bridging EN/ZH communication and European buyer expectations.

EDUCATION

MSc Human-Computer Interaction (Distinction, 76/100) University College London (UCL) 2022 - 2023
Modules: Interaction Design (83), Perception and Interfaces (82.9), User-Centred Data Visualisation, Interaction Science.

- Led design team for ACM CHI competition, organising brainstorm and co-design sessions; acted on camera for promotional video.
- Research contributed to [ACM CHIWORK '25](#), presented in Amsterdam; [pitched findings to Google](#) via UCL Interaction Centre.

BSc (Hons) Product Design (First Class, 71/100) University of Leeds 2019 - 2022
Modules: Advanced Electronics (92), Understanding Data in Social Sciences (80), Interface Design, Service Design, Human Factors.

- Thesis: StairAid ergonomic crutch, awarded 72/100 (Distinction). Entered [New Designers 2023](#), and published on [Dezeen](#).
- Served as Leeds Chinese Ambassador, promoting Leeds culture through CSSA Leeds, Visit Leeds, and Leeds City Council.

SKILLS

Product Design: End-to-end product design, web/mobile experiences, IA, onboarding, engagement, retention, conversion, service design, journey mapping

Research and Experimentation: User interviews, usability testing, heuristic evaluation, heatmapping, session recordings, A/B testing, GA4, cohort analysis, behavioural insight

Product Systems: Figma libraries, scalable UI patterns, journey components, design tokens, handoff documentation, WCAG-compliant design

Tools and AI Build: Figma, Miro, Framer, Webflow, Vercel, Claude Code, Codex, Figma MCP, AI-assisted prototyping, UX simulation, HTML, CSS, JavaScript, Git, CI/CD basics

Skilled Worker Visa holder, sponsorship transfer required
